

# Personal Data Collection

A sample **rule** to demonstrate prefilling and collecting information using RSign.

Purpose of this example:

- 1 – Prefilled:** The two text elements will be provided by the backend. These fields must be write-protected. It could also be used for prices, dates, etc.
- 2 – Prefilled & editable:** This text element will be provided by the backend as well, but it can be modified by the user. Use cases is when a backend information needs being correct.
- 3 – Editable:** Long text, empty by default.
- 4 – Editable:** Entry text fields for the user.
- 5 – Selectable:** Drop down list control and a vertical radio button control.

	CustomerNbr <b>RO</b> , labelControl	ContractNbr <b>RO</b> , labelControl
1	CRM_0027106	CRM_00162846
	CustLongString1 <b>RW</b> , textControl	
2	CCRRMM_2024-February-22 16:41:52 - Edited by Johnny Doesitwell	
	CustLongString2 <b>W</b> , textControl	
3	This long string was added in the RSign form by Johnny Doesitwell	
	CustEntryText1 <b>W</b> , textControl	CustEntryText2 <b>W</b> , textControl
4	This entry text 1 too	This entry text 2 as well
	DropDownList – 4 items dropdownControl	VertRadioButton – 3 choices radiobuttonControl
5	Beethoven	<input type="radio"/> Mercury <input checked="" type="radio"/> Venus <input type="radio"/> Earth <input type="radio"/> Mars
